Workstreams (upto 2025) ~~Strategic Outcomes and Targets~~

Discuss the Strategy Outcomes you seek across key stakeholders and themes :

Innovation

Science and Technology

- water - methane - carbon → Lets get PAU to start thinking about this (long term)
- Landscape food scope analyses w/ a partner (PAU?)
- Revolving fund (Farmer Assoc.) → not donor fund → loan → Research universities both of nature of PD & pilot design

Research

- Surface seeding - adoption, impact (yield, water, burn).
- Costs of changing mill technology to adopt PR 126 attitudes → strategy, what are constraints, barriers?
- Identifying & scaling other local innovations

Practice

- Strategy social learning & peer-peer learning
- Partial burning - what are the emission reductions → need to have more detailed work on area.
- Support for farms

Short-term Strategy and Long term Research

- Influential farmers, Recognizing (community) of No-burn farmers & Guardians
- Messaging outside Guardians
- Can Kethi. dots be a source of peer learning strategy
- Centola
