Topic	Communities	Farmer	Donor	TNC
Innovation	- access to finance for machinery e.g. microloans	- deeper understanding of tech (existing) - opinions of farmer part of tech development process - creative solutions for farmer machine access	more donors that can do in-kind tech solutions	- what gaps? what research we need between research & extension activities *MS Teams to address internal concerns
Partners	landowners & diaspora for addressing leasing issue extend lease time	help millers accept/process PRI261 other rice varieties need tech adjustment	donor (BEF) acts like a partner	- diverse collaborations e.g. water, renewables, women emp.
Policy	streamline process for access to machinery custom hiring centers (ask Simranjit)	policies actually work to - support farmer no burn conversion - crop diversification	TNC gets FCRA 50	clear & streamlined decision-making - simple, logical team structure e.g. sub teams A new beginning!
People	innovation: we address for farmers so they will assume risk insurance	Farmers ♥ TNC 4eva!		trainings for staff - HET - RAPID *Governance
